APIResponseAssertions

The APIResponseAssertions class provides assertion methods that can be used to make assertions about the APIResponse in the tests.

Sync   **Async**

```python
from playwright.sync_api import Page, expect

def test_navigates_to_login_page(page: Page) -> None:
    # ..
    response = page.request.get('https://playwright.dev')
    expect(response).to_be_ok()
```

Methods

not_to_be_ok

Added in: v1.19

The opposite of expect(response).to_be_ok().

Usage

```
expect(response).not_to_be_ok()
```

to_be_ok

Added in: v1.18

Ensures the response status code is within `200..299` range.

Usage

```python
import re
from playwright.sync_api import import expect

# ...
expect(response).to_be_ok()
```
